

What could happen if you shared your location with an ad like this?

## Benefit

Apps can direct you to offers at local markets

## Risks

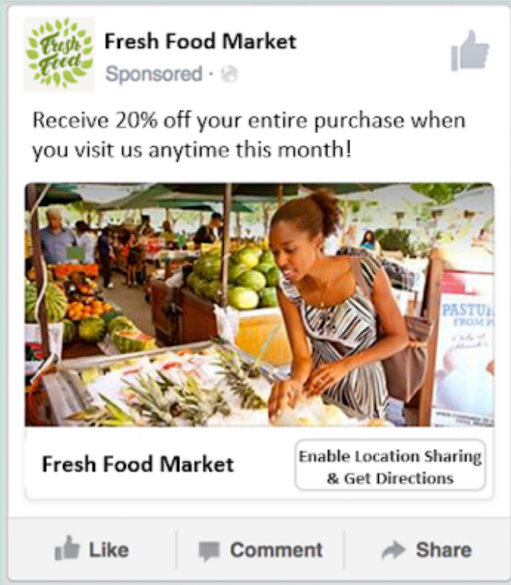

Apps can use your data to trace your location

Location sharing can lead to online and physical privacy threats

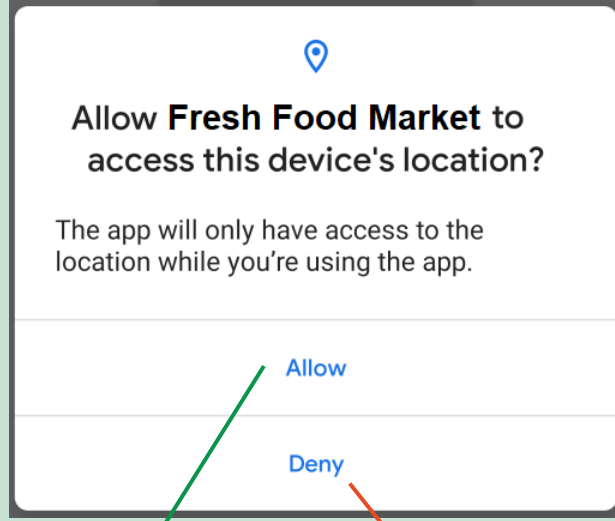

## Some helpful tips:

## Option 1: Decide if you want to share location

Click on --> **Enable location sharing & get directions**

If you **TRUST** the app select --> Allow

If you **do not TRUST** the app select --> Deny

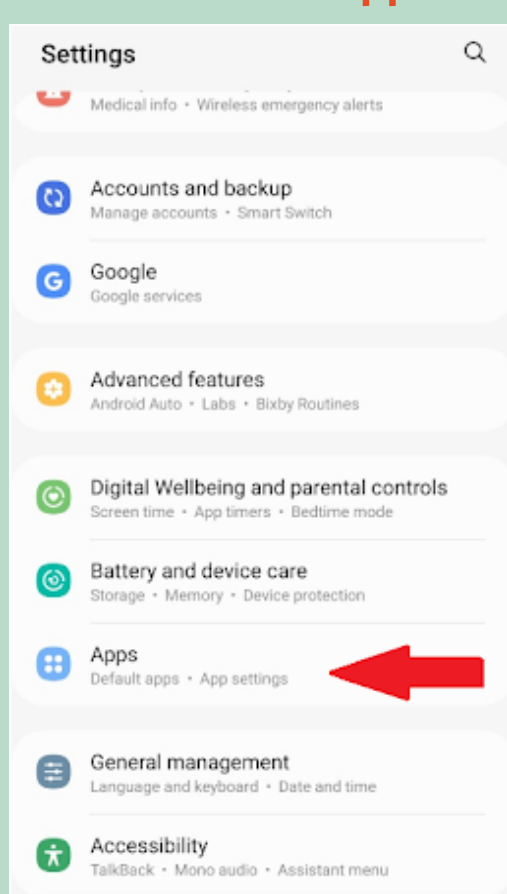

If you **ignore** the ad and don't click on anything, your location will **NOT** be shared.

## Option 2: Turn off location sharing for all of Facebook

### Step 1

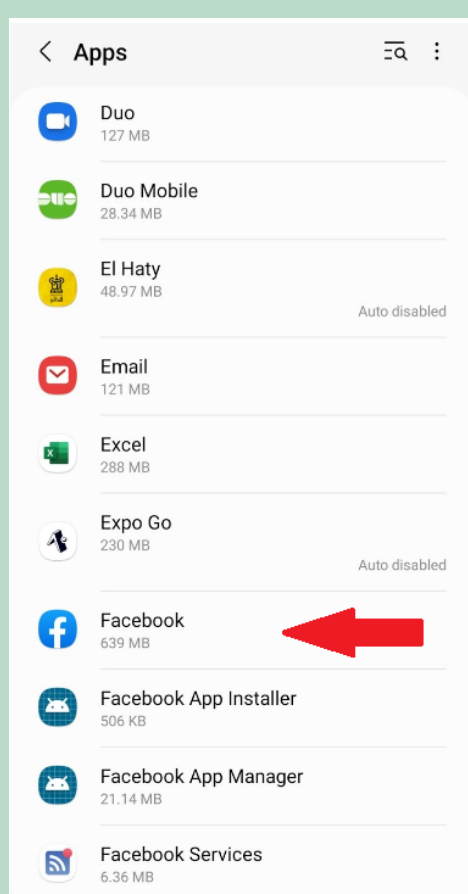

Open the **Settings** app

--> Click on **Apps**

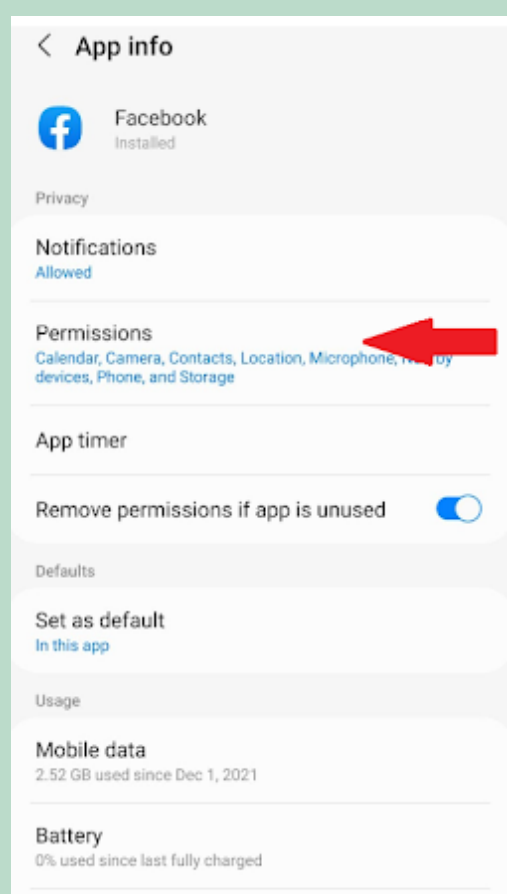

### Step 2

Click on **Facebook**

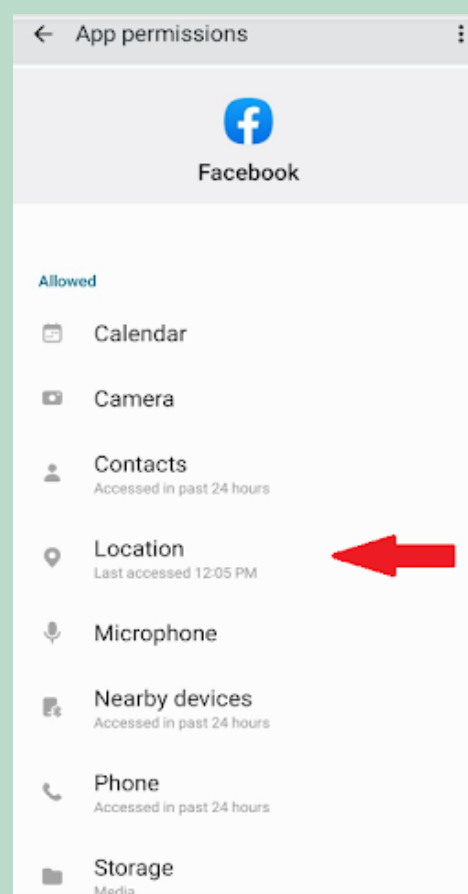

### Step 3

Click on **Permissions**

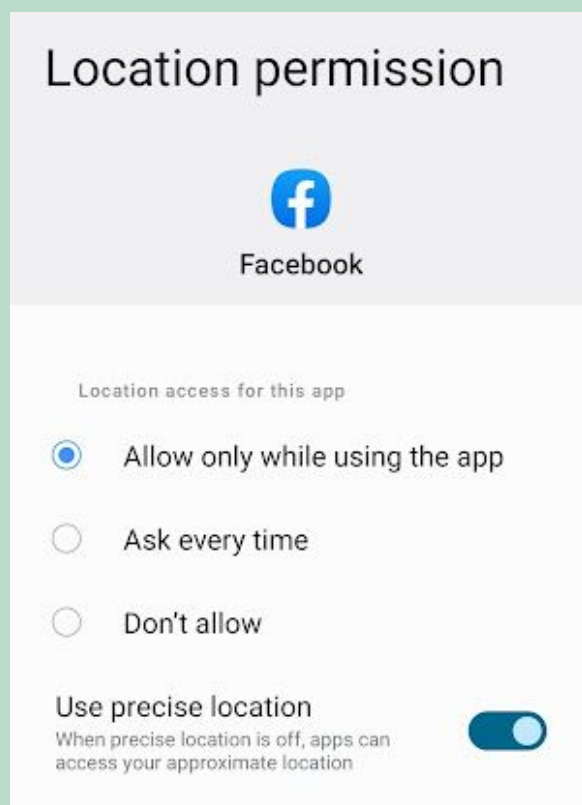

### Step 4

Click on **Locations**

### Step 5

Click on **Don't Allow**

## Final Note

If you need to use apps that require location permissions, such as Maps or ridesharing apps; you can give app permission **individually** by going to

**Settings > Privacy > Location Services**

and allowing only certain apps to use location services.
